IMPORTANT NOTICE

RAC reserves the right to change instructors, course schedule, etc. Efforts will be made to notify registered participants of changes; however, RAC will not be responsible for any costs incurred, including airfare (or penalties) and hotel, as a result of cancellation, instructor, date or time change.

OCTOBER 25 AND 26, 2005

**15TH INTERNATIONAL
CHEMICAL CONTROL SEMINAR**

**Presented by
Regulatory Assistance Corporation
(RAC)**

The international trade in chemicals is growing rapidly, making it increasingly important for those in the chemical industry to be aware of and comply with international chemical control regulations. Among the most important of those are the regulations requiring the notification and in some countries registration of new chemical substances.

This seminar provides the latest information on global developments in chemical notification and registration requirements.

It is particularly timely because of a number of recent developments, important of which are the active notification requirements in China, the announcement by the Korean government of a major "crack down" on chemical notification/registration violators and continuing developments with REACH.

RAC is pleased to announce the 15th International Chemical Control Update and Recent Developments Seminar to be held on October 25 and 26, 2005 at the Ramada Inn and Conference Center, 212 Woodlawn Road, Charlotte, N.C.

TOPICS TO BE DISCUSSED

As you will see from the Seminar schedule, we have once again assembled a faculty of government officials and industry experts to present –

- A Global Perspective To New Chemical Notifications
- The latest new chemical notification developments in China
- The latest new chemical notification developments in Korea
- REACH – Status of REACH Program in the EU
- New and Future Developments in Approving Food Contact Materials in the EU
- Nanotechnology – The New Regulatory Frontier
- Preparations Directive Update and Compliance Requirements
